We are excited to announce our featured speakers for our upcoming Disney Play & Learn Conference November 7-12, 2024, at Disney World's Contemporary Resort in Orlando, FL!

Join us on Friday, November 8, 2024, as Dr. Alex Molinari presents Full Arch Rehabilitation with Remote Anchorage Approach: A Surgical and Prosthetic Prospective.

Full arch rehabilitation with dental implants in edentulous patients or with compromised remaining teeth is a highly predictable treatment. Three-dimensional position of the implants, as well as bone reduction, are crucial points for treatment success, therefore, tilted implants must be designed minimizing the extent of cantilever and avoiding the commitment of the maxillary sinus and inferior alveolar nerve. The hybrid prosthesis is the most common type of prosthesis used in this kind of treatment and minimum space is required to allocate for the prosthetic abutment, the framework and the teeth. This training aims to demonstrate the need for bone reduction, proper implant placement and proper selection of straight and/or angled abutments.

Dr. Alex Molinari is currently the Director of Clinical Professional Relations and Education for Neodent USA, Inc. Dr. Molinari received a PhD in Periodontics from the Pontifical Catholic University of Paraná (PUC-PR_BRAZIL), and a master's degree of implantology by the São Leopoldo do Mandic University (Campinas, BRAZIL). Dr. Molinari is a specialist in periodontics at the University of Santa Catarina (UFSC – Florianopolis - BRAZIL) and holds a graduate degree in implant prosthesis from the University of Sagrado Coração (USC – Bauru - BRAZIL). He formerly taught at ILA-PEO in Curitiba, BRAZIL and was a Neodent consultant for 22 years.

Join Dr. Jennifer Derse on Saturday, November 9, 2024, at 8:00 am for her presentation on Clear Aligners and The Ultimate New Patient Experience.

Struggling to create comprehensive treatment plans for your patients? As dentists, we must care for our patients and establish holistic care systems, which isn't always easy. Avoid basic treatments like drilling and filling. During the Saturday morning session, you will learn to develop thorough treatment plans and comprehensive care systems following Dr. John Kois's four categories. In addition to covering comprehensive treatment planning, Dr. Derse will discuss case acceptance guidelines and share tips to enhance success in engaging and empowering patients in their dental care.

This presentation will help you understand the basic principles of DiSC behaviors, acquire new language skills for patient interviews, discover ways to adapt your approach to the patient's motivations, and so much more!

On Sunday, November 10, 2024, at 8:00 am, Dr. Derse will also present The Cosmetic Workflow and Biomechanics. This course will help you systematize your cosmetic cases efficiently and profitably from start to finish. We will start with best practices for documentation (including photography) and progress through the clinical workflow, covering records, preparation design, biomechanics, and cementation. By the end of this course, you'll have a collaborative process to achieve your patients' smile goals. You'll see examples of both successes and failures, learn from remakes—be it clinical or interview errors—and gain marketing insights to utilize your skills and enhance the patient experience.

Today, Dr. Derse is a mentor at the Kois Center in Seattle, WA, and leads the clinical mentorship of doctors at Espire Dental. As an educator and key opinion leader for several dental companies, she is passionate about growing doctors' skills in cosmetic dentistry along with leadership hospitality and has lectured nationally and internationally on cosmetics, restorative dentistry, aligner therapy, and case presentation and acceptance.
